Dear Recruiter,

I am writing to express my strong interest in the role of Software Engineer at Second Brain Labs. With more than 2 years of prior internship experience in software development and a passion for technology, I am confident that I would be a valuable addition to your team.

During my previous internships, I gained hands-on experience in developing and deploying software applications and features as per user requirements. I also collaborated with cross-functional teams (product, marketing and engineering) to deliver projects on time and to the highest standards. My technical skills mainly include C++, JavaScript, ReactJS, NextJS, Redux, NodeJS, Python, Go, computer Networks, Operating Systems, Cloud Computing, AWS and various Python, Javascript and Golang frameworks. My recent Internship was in a YC funded startup named Blaze ai. I worked on data pipelines, backend, distributed systems and microservices during my Internship tenure.

In addition to my technical skills, I am a quick learner with a problem-solving attitude and a strong communicator. I believe that my ability to work well in a team, as well as my drive and enthusiasm for software development, would make me an asset to your organization.

Thank you for considering my application. I look forward to the opportunity to further discuss my qualifications and enthusiasm for the role.

Sincerely,

Parth Lawania
